

A5490RR EDF

New Full Ration Silage Yield with Roundup Ready Crop Safety

2725 S-CHU
82-86 Days
(2600-2800
Silage CHU)
Ontario CHU

Hybrid Features

- Top end yielding Roundup Ready® silage hybrid with high leaf count
- Very high digestibility – low NDF
- Excellent palatability
- Roundup Ready crop safety yield advantage

Positioning/Management

Excellent mid maturity high yielding full ration silage. Adaptable in a maturity range from 2600 – 2800 CHU silage. Performs well under top fertility environments. Good emergence and seedling vigour. Roundup Ready hybrid to allow for the use of Roundup herbicides for control of broadleaf and grassy weeds. **For silage use only - not to be used for grain production.**

Position Against

- HL SR35
- TMF 2N422
- LF 950RR

Hybrid Management Guidelines

Medium-Late Flowering for maturity

Plant Height: Tall

Ear Angle Harvest: Semi-Erect

Ear Height: Medium-High

Cob Colour: White

Kernel Rows: 16-18

Kernel Texture: Soft

Disease Tolerance: Very good plant health

Harvest Population (000s per acre): 26-28 (final)
