

A5956RR

2875 CHU
91-95 Days
(2725-2900
Silage CHU)

**New - Roundup Ready Grain and
Silage Choice for Maturity**

Hybrid Features

- Top end tonnage and digestibility for silage
- Excellent emergence and seedling vigour
- Very good grain yields
- Outstanding spring vigour
- Very good NDF and ADF scores
- Roundup Ready *crop safety yield advantage*

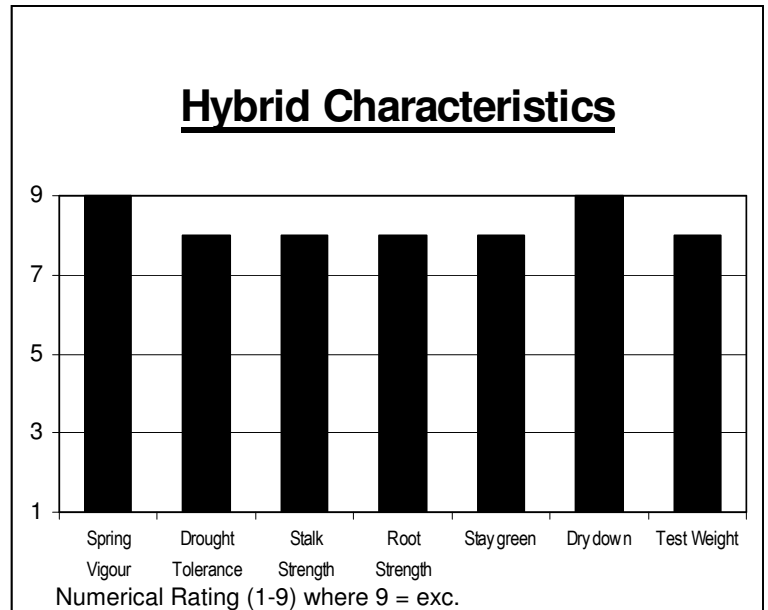

T•R•S

Positioning/Management

Grain hybrid that works as a silage or high moisture corn or for cob meal. Adaptable in a maturity range from 2725 – 2900 silage CHU. Grain hybrid that works as a silage or high moisture corn or for cob meal. Performs well under top fertility environments. Excellent emergence and seedling vigour. Roundup Ready *crop safety yield advantage* when using Roundup herbicides for control of broadleaf and grassy weeds. Works as a silage or high moisture corn and for cob meal. Works in similar environment as K303RR. HeroPack combinations with A6094G3 and A6719BtRR

Position Against

- HL SR35
- TMF 2N422
- LF 950RR

Hybrid Management Guidelines

Early-Medium Flowering for maturity

Plant Height: Tall **Ear Type:** Flex

Ear Angle Harvest: Semi-Erect

Ear Height: Medium-High **Cob Colour:** Red

Kernel Texture: Medium **Kernel Rows:** 16-18

Disease Tolerance: Excellent plant health

Harvest Population (000s per acre): 27-30
