NEW - Earliest Roundup Ready in Market
from Pride Seeds

Hybrid Features

- § Excellent grain quality enhances the test weight of this early hybrid
- § Excellent spring vigour
- § High yielding early Roundup hybrid
- § Good stalk and root strength for the early adapted zones
- § Can apply Roundup herbicides for weed control
- § Now approved for sale into Europe to allow maximum marketing flexibility
- §

Positioning/Management

Earliest Pride Roundup Ready corn hybrid. A fixed ear type which should be planted at the higher side of populations under high fertility management. Early flowering and average drydown make this hybrid adaptable to short growing seasons in the Eastern Canadian corn growing regions. On lighter soils keep population to low end of recommended ranges. Spray with Roundup based herbicides up to and including the 8-leaf stage.

Detailed Hybrid Information

Mid Flowering: 1010 GDU **Black Layer:** 1905 GDU
Plant Height: Medium **Leaf:** Upright
Ear Height: Medium **Ear Type:** Fixed
Cob Colour: Red **Kernel Rows:** 14
Disease Tolerance: Good plant health
Corn Borer Tolerance: Average tolerance to European corn borer
Harvest Population (000s per acre): 29-31
