# FORAGE SPEC SHEET

## STEALTH SF

StandFast - The New Generation of Alfalfa

**STEALTH SF**  
*Alfalfa is the first StandFast variety registered in Canada, and is available exclusively in BC from Quality Seeds West.*

*What do the StandFast traits do for you?*

- **Measured Faster Recovery** - up to 30% faster regrowth than other alfalfas, so that the crop can be harvested sooner and more often.
- **Improved Standability** - Lodging from heavy crop is reduced even to the later flower stage.
- **Top Quality and Persistence** - Fine stem size and good cell wall digestibility - among the best on the market today. In tests in Ontario, first cut averaged 21.54% crude protein and 173 RFV, with individual fields testing over 24% protein and 200 RFV.

### EFFECTIVENESS:

**STEALTH SF** has a Fall Dormancy rating of 4 and Winterhardiness rating of 2.1 - **very winterhardy and persistent**. It is best suited to areas with good irrigation and fertility management and can be used throughout BC for a profitable, nutritious hay crop.

### RECOMMENDED

#### USES:

- Hay
- Silage.

#### ATTRIBUTES:

- Very high yields over the season
- Extremely fast regrowth after cutting - successive harvest up to 5 days earlier
- Very Persistent - Fall Dormancy 4, Winterhardiness 2.1
- Resists lodging over the entire growing period - reduced field loss in delayed harvest
- Multi-Pest Resistance -

**STEALTH SF Alfalfa** ...extremely winterhardy and persistent.

Very resistant to disease and insect pests

- High multi-leaf expression
- Early maturity - suitable for matching grass maturity.

### AVAILABILITY:

**STEALTH SF** is a **premium variety** available exclusively in BC from your local Quality Seeds West dealer or sales rep., or directly from our Head Office in Langley, BC.
